

Deknudt Convex Small Mirror

Elegant convex mirror with large timber frame.
DK0937

Dimensions
Depth: 4cm

Colour : Black
Material : Coated timber

Description

This is another little black number that we love. The outward curve of the mirror artistically distorts images reflected. Like the Deknudt convex large mirror, the style is timeless and the impact fantastic.

This mirror is small but perfectly formed and has a generous timber circular frame finished simply and elegantly in black.

The deep profile of the frame means that this mirror can be used in quite traditional settings but also looks very glam in a more comfortable contemporary scheme.

Try grouping in threes or use with the large convex mirror to create stunning feature in a hall or above a console table ... these are the sort of details that make your interiors unique and individual!

Frame size 9cm.

Please note this is a convex decorative mirror.
