

Mooui Random Light White

White spherical textured pendant lamp made from coiled balls of yarn.

MO1440

Colour : White
Material : Epoxy & resin

Description

Epoxy and resin spherical pendant light collection by Moooi. Create showstopping installation with the iconic Moooi Random Light White.

Innovatively manufactured using a unique resin drained yarn production process, the Random Lamp is spun around an inflatable mould to create a translucent shade which allows your interior to harmoniously filter through.

Designed by Bertjan Pot for one of our favourite manufacturer, the epoxy resin is soaked in a white coated colourway as an accenting chrome plated steel canopy suspends the design in style.

Encouraging a dynamic interplay of shadows and light to fill your interior surroundings once illuminated, we love the idea of installing varying sizes together to form a showstopping gallery-worthy installation.

Discover more colourways in the Houseology Moooi collection to create a monochromatic lighting effect.
