Description

Vintage square trunk with polished stainless steel finish and worn leather trim and handles.

Invite the rustic modernity of the Andrew Martin Livingstone Steamer Trunk into your home interior space.

Inspired by antique luggage from a bygone age, this vintage travel chest is square in shape with the polished stainless steel finish.

Reflective with a glorious shine, the design features authentic leather detailing with worn leather trims and pull handles on each of the two storage drawers.

Side handles make lifting easy and an outward opening trunk storage provides plenty of room for treasured belonging or documents in the study.

Complement with designer furniture and lighting from the Houseology Andrew Martin collection for a fine fusion of designer style.

Please note: Hand sculpted by skilled artisans, each product is distinctively unique with no two storage trunks exactly the same.
