

## Bestlite BL9 XLarge Pendant

Powder-coated XL metal suspension downlight.  
BE0035

Dimensions  
Height: 50cm

Colour : Black

### Description

Powder-coated XL metal suspension downlight.  
First invented by Robert Dudley Best in the 1930s, the original Bestlite table lamp was celebrated in the prominent Architects' Journal as the first example of Bauhaus design in the UK.  
A modern interpretation of the original design, Bestlite BL9M XL is an industrial inspired pendant lamp with undeniable contemporary appeal. Presented in a choice of finishes with a matt powder coated shade, Bestlite provides controlled light in a downlight illumination, ideal for above your dining room table or kitchen interior.  
In a powder-coated matt finish, its dome-shaped shade exudes Bestlite's industrial roots and has been in continuous production since the 1930s. The design is complete with a 2.5m flex- which can be fitted to your preferred height and accenting ceiling rose.  
Light source: 1x E27 max 80w halo or 1x E27 20w CFL or LED (not included)
