### Description

Stylish trunk with professional brass hardware, locks and steamed cherry wood bent slats and honey finished wooden inside, complete with hand turned legs which means it also looks great as a coffee table. Inspired from days gone by when travel was only for the elite and the Gare Central was manned by porters carrying trunks filled with champagne flutes and dispensers for foie gras to people's private carriages on the Orient Express. Please note requires some self assembly. Due to the artisan hand crafted production methods and natural materials used, each trunk is utterly unique every time with no two exactly the same making this a bespoke focal point you can truly call your own.
