Description

Leaning full length mirror with LED baroque inspired frame. Created by Ann Grymonpon of Deknudt Mirrors, the innovative Scala Mirror combines ornate decoration with iconic contemporary design. Rectangular in shape the reflective glass mirror boasts a 5mm thickness with a polished F-edge front mirror and printed semi-transparent classic baroque frame design. Housing a superimposed skeleton of an antique frame, the design is elevated by an integrated LED lighting system which creates a captivating ambience in the heart of your interior scheme. A modernist twist on the full length mirror, with undeniable ornate appeal, this free standing leaning wall mirror can be placed against the wall (as pictured) or hung either horizontally or vertically. Features include:

- In-built RGB LED lighting strips
- Free standing with x2 protective removable rubber feet
- Can be hung horizontally or vertically
- Remote control which allows you to change the colour of the lighting strips (plain white, red, blue, green or yellow)

Please note: Power source via plug – please contact our customer service team to confirm if UK or EU adaptor required.
