Material : Laser Cut Steel

### Description

Channelling elegance and unique design to produce a stunning table fit for any home interior, Gubi introduce the Aoyama Round Table.

The table features a basic frame structure that consists of perforated pillar base in laser cut steel which offers the impression of visual lightness. The stool frame of the table is inspired by the letter 'A', an aspect conveyed in the overall appearance of the piece.

The table takes its name from the Aoyama district in Tokyo, an area famous for its fashion houses, restaurants and interesting shops. Drawing inspiration from these surroundings, the table features a heavy Danish-French influence as well as a subtle hint of Japanese style.

The Gubi Aoyama Round Table is available in one of two finishes, as well as one of two sizes, meaning the table can be customised to suit the interior scheme of your home while complementing the surroundings.

The table is shown in black and white laminate finish with powder coated base, while it is also available in black stained ash, smoked oak or black softcoating finishes on request.

Please contact customer services for further information on the range of finishes and options available.
