### Description

Gentleman's walking stick with brass knob hiding a compass.  
The Authentic Model's walking stick is a charming accessory for the distinguished gentleman.  
Its elegant design and shape has evolved over the centuries, once used for defence and duelling, whilst others held flasks and clocks.  
This charming reproduction is expertly hand crafted from rich wood with subtle hints of brass detailing.  
A charming alternative to modern day walking sticks, the brass knob hides a compass inside.  
Give this to the design connoisseur you know or lean in a lost corner of the home for a feeling of old world distinction.  
Please note: Hand sculpted by skilled artisans, each walking stick is utterly unique with no two exactly the same.
