

Designers Guild Eberson Aqua Rug

A beautiful ombre rug fading through to tones of aqua.

DG3145

Colour : Green

Material : Broadloom - 100% Rayon

Description

A beautiful ombre rug fading through to tones of aqua. Inspired by the captivating colours of the coral reef, the Eberson Aqua Rug from Designers Guild is a high energy rug sure to bring life to your interior. With its delightful tones of jade, aqua and sea blue, the Eberson rug works perfectly as a centre-piece in the lounge or hallway. The 100% luxury rayon is balanced in harmony as the sumptuous colours glisten and illuminate in a play of light. Hand-woven on a broad loom, the intensity of the rug is achieved by drying the yarns in the warming sun to create a radiant array of superb tonal colour. The stunning ombre pattern allows the rug to match well with many tones of aqua, duck egg or neutral interiors. A favourite with our designers, the Eberson Aqua Rug promises to inject a stunning style statement in both classic and contemporary interiors. Please note due to the production process and ombre effect, each rug is uniquely individual and colour variations are joyfully celebrated as no two rugs are alike.
