Description

MDF and aluminium wing shaped designer desk with brass fixings and iron legs.
Invite the aviator trend into your home study with the Eichholtz Wing Desk Right.

A strikingly different desk, the generous proportions of this unique designer desk take inspiration from aircraft wings.

A statement piece to remember, it is perfect for both classic and contemporary interiors and will combine harmoniously with a designer office chair from Houseology for the perfect complement.

Also available as a left position desk - sold separately here in the Houseology Eichholtz collection.

This is not a solid metal desk - the composition is as follows:

- The inner frame structure is made of MDF and mango wood.
- Balancing screws at bottom of the legs are made of brass.
- The brass legs are fixed to table with Allen screws on Iron plate which is fixed inside the desk,
- A thin sheet of aluminium foil of thickness 0.1 mm is pasted on the sides of desk - these parts have a slight curve, creating an artisan wrinkled effect on the corners.

This desk is artisan crafted and each one is utterly unique every time therefore slight variations are to be expected and celebrated as this is a bespoke focal point that you can truly call your own.
