Description

Injected integral foam sculptural shell dining chair with polished chrome base.

Embrace the sculptural serenity of the Tonon Up Chair Integral Solid Coloured Foam Polished Chrome.

This contoured shell dining chair with tripod base offers a sophisticated accent for classic and contemporary dining areas.

Offering an unsurpassed level of comfort, each shell seat embraces an organic shape formed using an innovative shell manufacturing process. Developed in Italy using the 'Freeform Advanced' production technique, the colour injected integral foam seat creates an exterior which feels like plastic yet with a foam-like bounce.

The chair is then elevated by a strong polished chrome base and the look is complete with recess waist detailing which encourages the beauty of your interior surroundings to harmoniously filter through.

Combine with a designer dining table from Houseology to complete your 'Made In Italy' aesthetic in style.

Please note: This chair can be produced in a choice of 12 colourways and is also available in a choice of matt and lacquered steel base finishes or contrast wooden leg options.

If you are interested in any other configurations, please contact our customer service team for more information and a pricing quotation.
