Description

Aluminium and steel retro pendant light collection from Innermost. The Glaze 14 is made from aluminium, steel and silicone, while the exterior and interior bodies have a copper and ivory finish. The use in colour and finishes offers a striking contrast that ensures the lamp will light up the room. The light hangs over the surroundings from a suspension cable which is attached to an integrated ceiling assembly. Exuding warmth with an industrial aura, the light will look great in a timeless or contemporary interior scheme. The Glaze 14 pendant is designed by Corinna Warm and is one of a range of Glaze products in different shapes and sizes. Mix together with other Glaze products for a unique take on the lighting arrangement throughout your home and an injection of original style.
