Colour : White  
Material : Steel & Ash

### Description

The One Step Up is a bookcase that combines form, material and function in a simple and chaste design.

Francis Cayouette has been inspired by a simple ladder as object and he has created a new flexible piece of furniture ideal for storage. One Step Up creates room and frame for storage. Place various One Step Up bookcases beside each other and create your own bookcase system. One Step Up high bookcase can also be used as a light room divider.

Francis Cayouette the designer explains: "I am very absorbed with multifunctionality, meaning products that can be used in various different ways. I wanted to design a flexible bookcase without an inconvenient disassembling process which easily could be moved around creating new spaces in the domestic home or the office. The classical ladder is easy to move around in the room where you need it. The idea of taking the form of the ladder seemed logical. The final result is a bookcase that looks like a ladder with exposed fittings and a wooden frame but with the quality and finish characterized by superb furniture."
