### Description

Solid oak contemporary dining table by Muuto.  
Choose the Muuto Split Table for the ultimate complement for contemporary entertaining.  
Celebrating the beauty of natural wood, this unique rectangular designer dining table forms the perfect backdrop for everyday dining and modern living.  
Featuring a smooth table top, this refined design piece features four rounded legs which give the illusion of being split in the middle as they meet the table top.  
Created by designer, Staffan Holm, he included the sculptural base as reference to skilled Danish cabinet-makers expressing their qualities in craftsmanship.  
With minimal detail and a simple expression, the table captures the essence of Scandic design principles and is guaranteed to never go out of style.  
Complement with designer dining chairs from the Houseology Muuto collection for a layered statement of unique contemporary style.  
Please note: Due to the natural production process and materials used, each dining table is unique every time with no two exactly alike.
