### Description

Sit in simple style with the Muuto Visu Chair.

This chair comprises a powder-coated steel wire base with a lacquered natural oak seat shell resting on top of it.

Offering a classic take on a traditional piece, the chair is designed by Mika Tolvanen and is the result of a design process lasting almost two years.

The name 'Visu' is a reference to the Finnish word for 'precision', an apt name for such a detailed and meticulous piece.

The Muuto Visu Chair with Coloured Wire Frame/Shell comes in seven different finishes.

Group one together to create a consistent seating arrangement or mix and match the shades for your own unique take on designer style in your home.
