Description

The Innermost Canvas armchair was designed by YOY in Tokyo and launched by Innermost as a quirky option for a lounge chair.

This unusual seat has a surreal cartoon feel where the impossible happens. Each chair allows you to lounge effortlessly on a 2 dimensional artwork image leaning against a wall.

With a printed monochrome background of a classically styled chair, each seating recess is formed in a synthetic printed fabric.

As well as being a central focal point, this armchair works perfectly as additional party seating, and can be stored easily due to the thin frame design.

As fearless ambassadors of their own ideology, Innermost are a company who believe that humour is the best source of inspiration.

Matching Innermost Canvas sofa available.
