Description

The Innermost Canvas sofa was designed by YOY in Tokyo and launched by Innermost as a quirky option for a sofa.

This unusual sofa has a surreal cartoon feel where the impossible happens. The sofa allows 2 to lounge effortlessly on a 2 dimensional image leaning against a wall.

With a printed monochrome background of a classically styled sofa, each seating recess is formed in a synthetic printed fabric.

As well as being a central focal point, this sofa works perfectly as additional party seating, and can be stored easily due to the thin frame design.

As fearless ambassadors of their own ideology, Innermost are a company who believe that humour is the best source of inspiration.

Matching Innermost Canvas armchair is also available.
