Description

Take the weight off your feet and let the sun beam down on you with the stylish Columbus Sun Bed from Skagerak.

The sun bed has a teak wood frame with two wooden legs to the front of the piece and two wheels at the back, making it easy to move.

The natural teak wood features aluminium and stainless steel fittings that add a subtle contrast while it is finished with a woven synthetic material cover in a white or black finish.

Use the lounger in the garden for simple designer style that channels a sophisticated monochrome feel to the exterior.
