Description

Make room at your table for friends and family with the Skagerak Selandia Extension Leaf.

The extension is a large table top section with slatted pattern design and table connectors found underneath. It comes in a teak wood finish. From the Selandia range of Skagerak, every product draws inspiration from light, space-saving furniture that was used on classic Atlantic steamers. Each piece in the collection represents a contemporary take on vintage maritime furniture.

Add the extension to the table when entertaining large groups or hosting an annual garden party.
