Description

Teak luxury garden armchair from Skagerak.

Extend your discerning interior style outdoors with the Skagerak Skagen Chair Teak.

Grab a chair by the table or on the patio with the elegant Skagen Chair from Danish brand, Skagerak.

A contemporary garden furniture addition, specifically designed for outdoors, this outdoor seating solution comprises a minimal look with straight line design, hollow pattern on the seat back and a slatted seating surface.

From the Skagen luxury garden furniture collection, the range takes its name from the most northern town in Denmark. The unassuming and gorgeous line details and materials used in the range epitomise the strong connection Skagerak still has with Skagen.

Combine the chair with other contemporary garden furniture from the Houseology Skagen outdoor collection to complete your outdoor arrangement in style.

Please note:

The natural teak material is chosen specifically for outdoor use for its strong durability against water and UV rays.

During hard winters and adverse weather conditions, we recommend sheltering to protect this piece of modern garden furniture for many years to come.
