### Description

Award winning polypropylene chair designed by Philippe Stark. The Masters chair draws influence from the masters of twentieth century interior design and is a fusion of three iconic chairs; 'Series 7' by Anne Jacobsen, the 'Tulip Armchair' from Eero Saarinen and the 'Eiffel Chair' by Charles Eames. With an unmistakable graphic look, the collection is available in a range of colours. Characterised by its interweaving curved seat back and smooth rounded seat, it is easily stackable making it functional as well as effortlessly beautiful. We love the durable polypropylene material used to craft the fluid lines of this stunning chair which is perfect for indoor and outdoor use. The timeless Masters Chair is a fine addition for any interior scheme, where it will channel modernity and iconic style for years to come.
