---

### Description

Polycarbonate coloured stool designed by Philippe Starck. Made for Kartell, the La Boheme Stool 2 is the result of the designer's creative spark and Kartell's exclusive technology - being used for the first time - that breathe life into this captivating design. In the shape of a traditional vase, the stool acts as a practical seating solution and takes its name from the classic four-act opera composed by Giacomo Puccini. To be used indoors and out, the stool comes in five colour finishes, offering your interior a unique and decorative addition. The La Boheme Stool 2 is also available in another variation from the Kartell collection.
