Description

Technopolymer thermoplastic and steel painted epoxy polyester chair by designer, Patricia Urquiola.

Made by Kartell, the Comback Sled Base Chair is a contemporary interpretation of a classic Windsor chair.

With a slatted backrest consisting of seven plinths and a sturdy seating surface, this rests on two sleek tubular sides.

A single mould chair, it is the epitome of practical and ergonomic design which offers a nostalgic draw to the room.

The combination of plastic and pastel colour finishes channels an air of modernity and grace.
