Material : Transparent Or Batch-dyed PMMA

Description

Small transparent thermoplastic cabinet, designed by Philippe Starck with Eugeni Quitllet. Made by Kartell, the Small Ghost Buster Cabinet is Starck's new take on a classic furniture piece combined with Kartell style that embodies the lines of traditional furniture while adding a modern twist to it. Combining corners, curved and straight lines with smooth surfaces, the gorgeous cabinet is brought to life through eye-catching views and reflections. It has a solitary open front storage space and can be used as a side table in the lounge or bedroom. The cabinet also has an "older brother", in a larger variation, which can be grouped with this for a consistent look in your interior.
