Description

Transparent polycarbonate chair in colour finishes, designed by Philippe Starck with Eugeni Quitllet.
The Hi-Cut Chair combines flawless ergonomic design with sturdiness and flexibility.
The vertical stripe pattern at the top of the chair adds a unique take on the light and its reflections while its minimal and simple design resembles an art deco look.
The chair is created from a single mould of plastic with gorgeous curves and angles.
The front legs are squared while the back legs and backrest have a smoother look with rounded design, bringing the design into focus.
Grouped the chairs together to create an eye-catching seating arrangement.
