Description

Veneer lacquer chipboard bookcase with thermoplastic dividers in transparent or satin finish, designed by Nendo. From Kartell, the dividers of the Sundial Bookcase are set at different angles to resemble the shadows created by a sundial. This offers the furniture piece a unique aura and original look that is sure to stand out in your interior. It comes in a black or gloss white frame and has four shelving spaces to hold books. Airy and versatile, the bookcase can be grouped together to create a larger bookcase in the study or home office.
