Description

Coated steel adjustable table lamp with linen shade. Taking inspiration from fashion and popular culture, the Fork Table Lamp has been created by a collaboration between Diesel and the luxurious Italian lighting brand Foscarini. Reminiscent of the comforting glow of a torch inside a camping tent, the light inside highlights a textured patchwork structure. The lamp is supported by an industrial steel stand which supports the sumptuous dyed linen fabric of the drum lampshade which features outer stitching like that of a pair of jeans. Characterised by its earnest luminosity, the Fork is perfect for introducing a radiant ambience with an industrial edge into your interior. Easily adjustable and available in a number of colours, the Diesel Fork table lamp can be rotated 360 degrees making this a fun and practical lamp perfect to suit your interior needs. Requires 1 x 120 W ECO HALO bulb, 118mm R7 (not included).
