Description

A warm white LED wall reading light with rectangular shape.

The Chelsom Dock Wall Light is housed within an adjustable head that swivels 90° left, right or forward to allow different reading angles.

It docks into a semi recessed metal backplate which can be vertically or horizontally mounted.

Made from an eye-catching combination of brass and steel it is perfect for recessing into walls or bedheads.

Hardwired: Professional installation recommended.

Please note requires a 6.5cm depth to house fitting.

Dimmable as standard: No

IP Rating: IP20

Net product weight: 0.35kg

Light source: Integral LED included

Bulb: LED 1W 2700K

Shown with standard push switch button, docking switch also available, contact customer services for further information.
