### Description

Synthetic flat rope upholstered outdoor armchair with wooden frame. Lounge al fresco with the Knit Outdoor Armchair collection. Designed by luxury outdoor furnishing icons, Ethimo, this fine addition is the ideal remedy to extend your interior style outdoors. Expertly hand sculpted by skilled artisans, it is available in two luxury finishes, Natural Teak and Nero Stromboli Mahogany. A favourite with the Houseology designers, we love the free flowing design and fluidity of its weather-resistant synthetic flat rope weave seat which offers comfort and style. Combining a unique fusion of stunning aesthetic style with every day functionality, the Knit collection is the perfect luxury addition to enjoy precious time outdoors. Complete the look with other elements from the Ethimo designer outdoor furniture collection to channel sophistication and elevate your design scheme to the next level. Ethimo furniture is weather-resistant. We recommend storing indoors during high winds, hard winters and extreme adverse weather conditions. Teak wood ages over time developing a silver grey patina effect for added character. For additional peace of mind, Ethimo sell a waterproof rain cover - sold separately via our customer service team. Approximate net product weight: 6.5kg
