Colour : No

### Description

The Authentic Models Indianapolis red seat desktop model car pays homage to the original created by the famous Dooling Brothers, who manufactured around 1000 units at the time. They were closely modeled on the famous Mercedes Silver Arrows of the early 1930s.

Originals are now rare and highly prized by collectors. Moulded with the same exacting detail as its original, the Authentic Models 12.2" Indy racer is a hand-cast version in airplane aluminum.

Hand polished and buffed to a high shine, it features a unique detailed dashboard, faux leather seat, steering wheel and brake.

In keeping with its original model-toy character, the front wheels are not linked to the steering wheel. The wheel hubs and rubber tires are made with the same precision detail as the original.

Enjoy a truly unique piece of Grand Prix history.

This shiny, sleek luxury desktop racer represents both the romance and the dramatic beauty of the most famous Grand Prix racers ever and also makes the perfect gift for any petrol head in your family.
