Colour : White

Material : Shades: Mouth-blown White Opal Glass</br>Suspension: Black Chrome Plated or High Lustre Chrome Plated, Brass

### Description

White opal glass, chrome plated 3-shade pendant light system.

First commissioned for an exhibition in Paris, the PH 3/2 has remained an icon of design.

Designed by Poul Henningsen in the early 1920s, it provides practical, glare-free, everyday controlled lighting.

Emitting soft shadows and using only incandescent bulbs as a light source, it was popular in the 1930s for lighting private homes with high ceilings with the early shades sculpted from painted metal.

Updated for the 21st century, PH is a timeless design, made from a tapering system of textural opal white glass which is glossy on the top and sand blasted matt on the underside.

Taking a scientific approach to lighting, the tapered PH louvre design is based on the logarithmic spiral to ensure a soft, uniform illumination every time.

- 100% glare-free
- Max weight - Max 1.5kg
- Cable Length: 3m
- Symmetrical light distribution
- IP20 safety ingress protection
- Requires 1x 75W Max E27 Bulb (included)
- Suspension type: High lustre chrome plated, spun aluminium - cable (2x 0.75 mm<sup>2</sup>)

Please note: For larger ceiling heights, a special extension is available. Please contact customer service for further information.
