Description

Hand turned aluminium pendant lamp with matt lacquer finish. Complete your kitchen workspace with the Gubi Ronde Pendant Light. A timeless design icon, this bell-shaped pendant lamp was first created by Oliver Schick's in the 1970s. Ceramic like in appearance, the bell shade is hand spun for durable aluminium with an ultra-matt lacquered coating. Available in a choice of delightful heritage colours, Ronde features a unique overhang collar. The mainly downwards directed light from conventional pendant lamps does in this design also spread out of the spout-like opening, but also casts a sensationally smooth light gradient at the wire and ceiling. Schick's first creation for Gubi, it was - and still remains - a modern representation of minimalist lighting design. Includes fabric black wire canopy - except for Matt white with both fabric wire and canopy are white. Light source: E14 9W (13W max) fluorescent or 1 x E14 28W Halogen (bulbs not included) Includes: Fabric black wire canopy - except for Matt white with both fabric wire and canopy are white. Cable length: Approximately 5m.
