Description

Contemporary plastic shell dining chair with steel legs.

Embrace the minimalist, Scandic charm of the Normann Copenhagen Form Chair - Steel.

Designed by Simon Legald, Form is driven by his philosophy to create a shell chair with a more unified look.

The moulded plastic seat and frame of steel are integrated together using a unique cup system.

Each design element meets elegantly, accentuating the high quality craftsmanship of the design.

Providing back support where you need it most, Form celebrates a contoured aesthetic with the shell seat developed ergonomically to encourage good posture.

Crafted with the most meticulous attention to detail, Form celebrates a soft and welcoming silhouette which will enhance your interior beautifully with its modern-meets-minimalist expression.
