### Description

Brushed brass bracket ceiling and wall light with large globe light fitting. - Taking its inspiration from an entertaining juggler, spinning a set of spheres, the Flos IC C/W2 Light responds to the moment in the air when suddenly the spheres look perfectly still. Created by Michael Anastassiades, this charismatic wall light defies the rules of balance, as its simple brushed brass or chrome frame appears stationary against a floating blown glass spherical globe light fitting. Channelling a soft diffused illumination, it will make an inviting welcome in your entrance hallway or create a relaxing ambience in the heart of your living room interior scheme. Assemble directly onto your ceiling or at a right angle on your wall in either an up or downlight direction. Please note: This lamp is for indoor use only. Light source: 1x E1 205W Max HSGS light bulb (bulb not included) Globe: 30cm globe Weight: Approx 3.7 kg
