Description

Floating glass globe pendant lamp by Michael Anastassiades.

Capture the relationship between form and balance in the heart of your interior scheme with the Flos IC S1 Pendant Lamp.

Minimalist with a gentle expression, this spherical pendant lamp will bring an optical illusion to your interior space, with its angular rod suspension that appears to float its globe diffuser in mid-air.

Generating a soft, diffused illumination, the sphere is mouth blown from glass, with the angular suspension.

First created by Michael Anastassiades, exclusively for Flos, it will accent wonderfully with other Flos IC globes to create a captivating installation from above.

Taking its inspiration from a street juggler, the design is evocative of the performance of juggling a set of spinning spheres - responding to the moment when each sphere appears to float in mid-air, perfectly still.

Please note: This pendant lamp is for indoor use only.

Hardwired: Professional installation recommended.

Light source: 1x 60W E14 HSGS light bulb (bulb not included)

Globe: 20cm globe

Cable length: 4m

Net product weight: 2.2 kg
