### Description

Floating glass globe table lamp by Michael Anastassiades. Experience the interior relationship between form and balance with the radiant beauty of the Flos IC T2 Pendant Lamp. Gently minimalist with a hint of understated glamour, this spherical pendant lamp will create an optical illusion in the heart of your interior space with its angular rod suspension that appears to float its globe diffuser in mid-air. Hand-blown from glass by skilled artisans, the globe diffuser creates an inviting illumination as the angular rods - available in a choice of finishes - provide a welcome contrast. Created exclusively for Flos by Michael Anastassiades, IC T2 will accent wonderfully with other Flos IC globes to create a captivating installation from above. Inspired by a street performer juggling a set of spinning spheres - the IC Lights collection responds to the moment when each sphere appears to float perfectly still in mid-air. Please note: This pendant lamp is for indoor use only. Light source: 1x 205W E27 HSGS light bulb (light bulb not included) Globe: 20cm globe Cable length: 4m Dimmable: Dimmer on power cord Weight: Approx 3.6 kg
