### Description

Atomic particle shaped Cast Brass and Murano glass sculptural pendant lamp.

Atomic with a Mid Century Modern aesthetic, the Pieter Adam Organic Atomic Hanging Lamp will channel a dynamic dimension in your interior scheme.

A textural statement formed from Cast Brass, Atomic's shape takes its inspiration from the smallest particle that an element can be reduced to. An organic work of art, the Cast Brass rods interconnect uniquely every time.

Presented in a Dutch Silver finish the design is completed with Murano glass and silver leaf spheres which allow light to radiate in every direction.

Please note: If you would like to create your own bespoke architectural atom configuration, please contact our customer service team for pricing and production details. Each item is unique meaning no two lights are exactly alike.

Requires: 45x G4 LED light bulbs (not included)
