### Description

Contemporary outdoor footstool with wooden legs and flat rope finish. Extend your discerning interior style outdoors with the Ethimo Knit Footstool.

Reinventing a classic furniture piece, Knit takes inspiration from contemporary Scandic design and classic Italian outdoor spaces. Made from a strong, angular wooden frame, Knit takes its name from its woven flat rope synthetic weave cushion pad, complete in a welcoming charcoal grey finish.

Accent with complementing Knit furniture from the Ethimo outdoor collection to complete your aesthetic in style.

Natural teak weathers naturally over time to create a unique effect - cover when not in use with an Ethimo rain cover (not included)

The synthetic flat rope fabric is weather and UV resistant.

During adverse weather conditions we recommend sheltering indoors or for complete peace of mind, combine with the Ethimo Rain Cover (sold separately) - contact our customer service team for more information.

Approximate net product weight: 6kg
