Description

Polypropylene bar stool, available in a choice of colourways.

Create a colourful style statement with the Kartell Spoon Stool collection. Inspired by the profile of an everyday spoon, this beautiful contemporary stool collection has been joyfully created by Kartell designer's Antonio Citterio and Toan Nguyen.

Balancing comfort and style, Spoon features a gently curving design with a contemporary expression.

Sculpted from polypropylene in a choice of vibrant colourways, the ergonomically moulded seat promotes comfort, added to an adjustable central stem.

Use the gas pump to tweak the stool to your preferred height as the splayed foot design and triangular foot rest ensures a sturdy, balanced durability.

Place aside your kitchen island or add colour and vibrancy to your entertaining space, sure to impress your guests at your next stylish soiree!

Designers: Antonio Citterio and Toan Nguyen (2002)
