Description

Futuristic leather swivel chair with polished stainless steel base. Choose the daring designer decadence of the Andrew Martin Atom Chair.

A futuristic take on deep sea naval marine mines, this iconic design piece features a cladded exterior of geometric pyramids.

Sculpted from black lacquer, the exterior then nestles a comfortable swivel chair upholstered in luxurious black leather.

The design is complete with a rounded polished steel base offering a fine fusion of materials.

An iconic style statement for the heart of your design scheme, the chair will combine with other eclectic furniture pieces from the Houseology Andrew Martin collection to create a memorable installation of contemporary style.

Please note: Due to the handmade nature of this product, each chair is distinctively unique every time with no two exactly alike.
