### Description

Contemporary rectangular mirror with textured geometric frame. Functional and beautiful, this pared back designer mirror takes inspiration from the ancient art of Japanese origami. Textured with a timeless appeal, the rectangular frame features a geometric design with a rippled angular aesthetic. The thick PU frame is made to last and is guaranteed to never go out of style. Once light casts upon the frame, the design encourages a play of shadows and light, creating a dynamic focal point in your chosen space. A wide bevelled internal mirror completes the aesthetic with a classic metal wire hanging on the reverse. Explore the Houseology designer lighting collection to find the perfect complement to elevate your interior in style. This mirror can be hung both horizontally and vertically. Weight: 19kg (approx.)
