Description

Upholstered sculptural & Tradition swivel chair by Jaime Hayon. Add the final flourishes to your design scheme with the & Tradition Catch Swivel Base Chair. Developed from his passion of skating and graffiti culture, this playful contemporary swivel chair is designer Jaime Hayon's first contribution to the & Tradition collection. Welcoming you with open arms, Catch features a striking design piece with shell-like 'literal limbs' which create a seated embrace. The chair is then strengthened by a sturdy swivel base with polished aluminium construction. Moulded foam cushioning and Silk Aniline upholstery completes the look, ready to combine with accenting designer furniture from the Houseology & Tradition collection. Functional and stylish, Catch is a charming alternative to traditional desk chairs, great for promoting creativity in the heart of your office or home study. Please note: Due to the natural appearance of leather, the upholstery of this chair is unique every time with no two exactly alike.
