Description

Hand crafted wooden tray with duck egg and cobalt patterned glass inner.

Refresh your interior space in style with the Notre Monde Umbrellas Glass Tray Round Small.

Inspired by an aerial view of vibrant umbrellas on a rainy day, this unique circular serving tray is a fine complement for classic and contemporary interiors.

Hand painted, the unique clear glass inner features an abstract pattern of cobalt and duck egg umbrellas, set upon a natural back drop.

The design is then accented by a rustic wooden rim with recess handles making lifting easy.

Complement with accenting additions from the Houseology Notre Monde collection for a fine fusion of designer style.

Please note: Due to the artisan production process and materials used, each item is unique every time with no two trays exactly the same.
