Description

Round wooden tray with blue clear glass mist effect surface. Bring a new dimension to your home interior space with the Notre Monde Blue Mist Organic Glass Tray Small. An atmospheric design piece, this luxury wooden serving tray features a glass surface with a difference. Creating an enthralling dyed effect, the tray features a unique mist-like design. Similar to the effect of a droplet of petroleum in water, tones of blue and grey combine to create an ombre design which is remarkably unique every time. Dyed on glass, the tray surface is then framed with a circular encasing to stop the contents of the tray from rolling off as recess handles make serving easy when entertaining with friends. Use as a guaranteed conversational piece at cocktail hour or combine with the Notre Monde Tray Table Base (sold separately) to create a stunning side table solution in the heart of your design scheme. Please note: Hand sculpted by skilled artisans, each product is unique every time with no two exactly the same.
