### Description

Minimalist beech wood dining chair with plastic shell seat in a choice of colourways.

Create the perfect backdrop for stylish entertaining with the NORR11 Langue Original Dining Chair Dark Stained.

Combining the soft clean lines of a moulded plastic shell seat with the minimalist beauty of natural beech wood Langue Original is aesthetic and functional design at its finest.

Suitable to meet the demands of everyday use, this extraordinary designer dining chair brings a new dimension to both classic and contemporary settings.

Nodding to the angular proportions of Mid Century furniture, the rich grain structure of the beech wood legs brings an inviting contrast to the design completing the aesthetic in style.

Complement with a designer dining table from the Houseology NORR11 collection for a fine fusion of designer style.

Please note: The natural wood chair legs are distinctively unique every time due to the inherent grain structure of beech wood.
