Description

Aluminium right corner module sofa with showerproof cushions. Create a bespoke outdoor furniture arrangement with the Ethimo Infinity Module XL Right Corner. Designed using weather resistant materials, this extra-large modular right corner outdoor sofa module is the perfect accent for your outdoor living space. Minimalist with a timeless clean line design, Infinity's robust aluminium frame nestles a smart ultra-padded Ethimo cushioned upholstery offering an unsurpassed level of comfort during al fresco relaxation outdoors. Presented in a choice of fabric and frame colourways, the aesthetic is then softened with a textural woven exterior, achieved using Ethimo's bespoke synthetic outdoor Lightwick fibre rattan. Forming the perfect backdrop for al fresco entertaining and lounging, complement your outdoor furniture arrangement with other Ethimo garden furniture additions for the ultimate summer of style. Although developed using entirely weather resistant materials and showerproof fabrics, we do still recommend during extreme adverse weather conditions to shelter your outdoor furniture indoors particularly during hard winters and high winds. Keep showerproof cushion pads indoors when not in use and for enhanced protection and added peace of mind between uses, combine the sofa with the Ethimo rain cover (sold separately) - please contact our customer service team for more information. Approximate net product weight: 23kg
