Description

Matt black stainless steel serving tray with black mirrored glass inner. Channel a new dimension into your home interior space with the Eichholtz Gaia Round Tray.

Minimalist with a metallic quality, this luxury round serving tray exudes designer appeal.

A fine contrast of materials, the matt black stainless steel construction combines in a harmony with a black mirror glass inner for a harmonious, reflective contrast.

Featuring a slightly raised edging with recess detailing, this tray combines practicality and style - preventing items from rolling and unwanted spillages.

Use as a dining table centrepiece or add to serve drinks and cocktails at your next stylish soiree.

Be the envy of your guests by combining with other designer homeware, furniture and lighting additions from Houseology's extensive Eichholtz collection.

Please note: Meticulously hand sculpted by skilled artisans, each serving tray is distinctively unique every time with no two exactly alike.

Approximate net product weight: 5kg
