Description

Graven limited edition designer monochrome cushion. Welcome depth and dimension into your home interior with the Graven Stick Cushion 45x60cm White. Designed by Graven Creative Director, Janice Kirkpatrick OBE, this rectangular boudoir cushion takes reference from observational sketches of the Scottish countryside. Presented in a choice of monochrome colourways, each contemporary cushion is made from pen sketches of sticks lying on glass found by Janice and her pet Turkey, Harry, after a particularly blustery storm in the home field of her Ayrshire farm home. Highly detailed, the quality of the sketched lines and marks used in this drawing give this contemporary cushion an abstract quality making the cushion the perfect complement for furnishings with particularly large or particularly small scales. Reinterpreting natural debris which would normally be overlooked into an intriguing pattern, this designer cushion collection is exclusive to Houseology and is a guaranteed conversation piece which will remain stylish season after season. This heavy cotton panama cushion includes a luxury feather filled cushion inner for unsurpassed comfort.
