Colour : Orange  
Material : 100% Polypropylene

### Description

100% polypropylene indoor/outdoor rug with diagonal striped pattern and fringed edges.

Transform your garden patio into an outdoor living space with the GAN Diagonal Almond Alfombras Indoor/Outdoor Rug.

Gandia Blasco's first outdoor rug collection, GAN's Garden Layers Diagonal Rug is a unique contemporary rug collection designed by emotive Spanish architect and renowned product designer Patricia Urquiola.

Inspired by architecture found on her recent travels throughout India, this polypropylene rug features a harmoniously balanced yet equally durable design which will complement both indoor and outdoor environments. Inviting a welcoming sense of graphic appeal into minimalist areas, the diagonal striped pattern is achieved from innovatively hand and power looming contrasting polypropylene yarns.

Playful fringed edges then welcome a lovely tactility to the design, completing the look in style.

Available in a choice of colourways and sizes, find the perfect complement for your space and discover more al fresco interior design inspiration in the Houseology designer outdoor furniture collection.

Please note: Although this product is made from weather resistant polypropylene yarns, we do recommend storing your designer outdoor rug indoors during extreme adverse weather conditions and hard winters.

Net product weight: 8.5kg (M) 12.5kg (L)
