Description

Leaning iron frame storage shelf unit with fir wood shelves. Welcome the character of natural wood into your interior with the Houseology Soho Collection Wally Shelf - Fir Wood Grey Iron. A functional focal point for the home or office, this industrial style designer storage shelf unit offers a fuss-free aesthetic for modern living rooms and workspaces.

Supported by an industrial iron wall mounted frame, Wally creates a ladder-like storage solution with five chunky fir wood storage shelves, each tapering in size.

Lipped at the rear to prevent items for sliding off, the shelving capabilities provides a characterful pedestal for your own curation of potted plants, metallic vessels and literature.

Fixing directly to the wall, the iron bracket system gives this discerning design piece an inviting architectural presence which still encourages the elegance of your existing wall decor to harmoniously filter through.

Appearance: Due to the characterful aesthetic of fir wood grain, the aesthetic of each storage unit is utterly unique with no two exactly the same.
